**Title: Seminar on revival of traditional culture & knowledge of Indigenous people by mitigating Climate change**

The Seminar on Climate Change and the Erosion of Traditional Knowledge among India's Indigenous Communities highlights the critical issue of climate change's impact on the rich cultural heritage and wisdom of India's indigenous groups, such as Adivasis, north-eastern tribes, central Indian tribes, and Western Ghats residents. Climate change disrupts traditional practices, affecting agriculture, ecosystems, medicinal plant knowledge, and cultural practices related to the environment.

Some communities face disproportionate challenges, like the Jarawa's dealing with rising sea levels. The erosion of traditional knowledge arises from environmental changes, displacement, assimilation, and lack of recognition in climate policies.

The seminar aims to raise awareness, emphasize the role of Sustainable Development Goals (SDGs), share best practices, and empower indigenous communities. It spans two days, featuring presentations, panel discussions, and insights into traditional knowledge's significance and international organizations' role.

The evaluation process includes pre- and post-seminar surveys to measure knowledge and attitude changes, feedback forms for improvement suggestions, and a review of outcomes. Continuous improvement ensures future seminars better address the challenges faced by indigenous communities regarding climate change and traditional knowledge preservation.

## RAM DAYALU SINGH SUSTAINABLE DEVELOPMENT FOUNDATION

(REGISTERED PUBLIC CHARITABLE TRUST)

Social Impact through Social Change for Sustainable Development

### Seminar on revival of traditional culture & knowledge of indigenous people by mitigating climate change

#### About:

The relationship between climate change and the loss of traditional knowledge among India's indigenous communities is a complex issue. These communities, such as Adivasis, north-eastern tribes, central Indian tribes, and those in the Western Ghats, have preserved their unique cultural heritage and wisdom for generations. However, climate change now threatens to erode this invaluable knowledge.

#### Impact of Climate Change:

Climate change disrupts traditional practices in various ways

1. Agriculture: Unpredictable weather patterns disrupt traditional farming, affecting planting and harvesting times, resulting in reduced crop yields.
2. Ecosystems: Climate change shifts plant and animal species distribution, impacting traditional hunting and gathering practices.
3. Traditional Medicine: Changes in the distribution of medicinal plants due to climate change endanger traditional healing knowledge.
4. Water Management: Climate change affects rainwater harvesting and irrigation methods by altering precipitation patterns.
5. Cultural Heritage: Climate change endangers cultural practices closely tied to the environment.

#### Most Affected Indigenous Groups:

1. Jarawa's of Andaman Islands: Threatened by rising sea levels and cyclonic activity affecting traditional practices.
2. Lepchas of Sikkim: Traditional farming practices are jeopardized by shifting weather patterns.

 91 98718 50888

 [schandrakabul@gmail.com](mailto:schandrakabul@gmail.com)

 <https://rdsdf.org>

 C-351 Golf view apartment, DDA, MIG Flats 3<sup>rd</sup> Floor, Saket, NEW DELHI -110017

3. Toda Tribe of Nilgiris: Disrupted cattle-rearing practices due to changing grazing patterns and water scarcity.
4. Gaddi Tribe of Himachal Pradesh: Climate-induced pasture changes affect traditional transhumance practices.

#### **Impact on Transmission of Traditional Knowledge:**

1. Environment Changes: Altered environments render some traditional knowledge obsolete.
2. Loss of Land/Resources: Loss of land and resources threatens knowledge tied to these areas.
3. Displacement/Migration: Climate-induced migration risks knowledge loss as communities leave ancestral lands.
4. Language Loss: Displacement and assimilation can lead to language loss, impacting traditional knowledge.
5. Recognition Gap: Lack of recognition in climate policies exacerbates knowledge loss.

#### **Examples of Impacted Traditional Knowledge:**

Climate change impacts various traditional knowledge areas, resulting in livelihood loss:

1. Agriculture: Unpredictable weather disrupts planting and harvesting schedules.
2. Hunting/Fishing: Climate-driven species shifts affect traditional practices.
3. Medicinal Plants: Changing plant distribution endangers traditional healing knowledge.
4. Water Management: Precipitation changes affect traditional water management.
5. Traditional Ecological Knowledge: Climate-induced environmental shifts disrupt ecological knowledge.
6. Cultural Heritage: Climate change endangers cultural practices tied to the environment.

Incorporating traditional knowledge into climate strategies is vital. The UN's SDGs offer a framework to address these challenges, promoting sustainable development for indigenous communities. Through this seminar RDSSDF wants to start a conversation and identify possible ways to preserve the indigenous knowledge and bring economical value in the current circumstance in a community centric manner.

#### **Problem Addressing:**

Climate change has impacted traditional practices of indigenous people resulting in loss of knowledge and livelihood practices.

## **Objective:**

1. To raise awareness of the link between climate change and the loss of traditional knowledge particularly within Indigenous and local communities
2. To highlight SDG 2030's role in preserving cultural knowledge and livelihood opportunity.
3. To share best practices and lessons learned in traditional knowledge preservation.
4. To promote community involvement and empowerment in preserving traditional knowledge while generating economic opportunity in current scenario.

## **Pre- and Post-Seminar Surveys:**

- Feedback collection: Assess participants' initial knowledge and attitudes.
- Measure changes in understanding after the seminar.
- Gather input and suggestions for future initiatives.
- Identify strengths and areas for improvement.
- Review of Key Outcomes:

In summary, this concise evaluation process ensures effective measurement of the seminar's impact, captures participant feedback, and guides continuous improvement for future initiatives.

## **Goal to achieve:**

1. Raise Awareness: Increase awareness about climate change's impact on indigenous knowledge in India.
2. SDG Relevance: Explain how SDGs relate to preserving traditional knowledge and provide sustainable livelihood opportunity.
3. Share Best Practices: Share successful preservation initiatives and insights to get ideas of successful strategies to be implemented by indigenous community.
4. Community Empowerment and support: Inspire indigenous communities to promote sustainable practices rooted in their traditional knowledge, potentially attracting financial support for implementing these practices, such as sustainable agriculture or resource management.

## **Financial benefit:**

1. Access to funding for community projects: Indigenous communities can become aware of government initiatives and funding opportunities.
2. Collaborative partnerships for joint initiatives: Networking at the seminar can lead to collaborative partnerships with experts, organizations, and government agencies which will led to financial support.
3. Support for sustainable practices: Promotion of sustainable practices of indigenous people may attract business, government to take-up the practices and implement elsewhere, These partnerships may result in joint projects and initiatives with financial support for the indigenous community.
4. Revenue from sustainable resource management: Indigenous knowledge of sustainable resource management can lead to responsible resource extraction, potentially generating revenue through the sale of sustainably harvested products.

## Seminar outline:

- Duration: Two Days,
- Date: Will Decide after Sanction
- Venue: India International Centre

### Speakers:

- Day one: 10 people ( Government officials, Social workers, representatives of indigenous community)
- Day two: 10 people ( Government officials, Social workers, representatives of indigenous community)
- Attendees: Approx. 100 ( Social worker, people from indigenous community, students and teachers.
- Media: 1 media person, 1 photographer and 1 influencer

## RAM DAYALU SINGH SUSTAINABLE DEVELOPMENT FOUNDATION

(REGISTERED PUBLIC CHARITABLE TRUST)

Social Impact through Social Change for Sustainable Development

### RDSSDF CFPGS SEMINAR 2 DAY EXPENSE PLAN

The **RAM DAYALU SINGH SUSTAINABLE DEVELOPMENT FOUNDATION**, located in New Delhi, South Delhi District, is preparing for a significant project titled "**Seminar on Revival of Traditional Culture & Knowledge of Indigenous People by Mitigating Climate Change.**" This **two-day** event aims to delve into the rich traditional cultures and knowledge of indigenous communities, exploring ways to preserve and revitalize them in the face of climate change challenges. While the exact event date will be determined following approval and coordination, our commitment to fostering cultural preservation and climate mitigation remains steadfast.
